If PI not in Physics, then Physics PI who takes responsibility for the activity (note: the expenses on this form are intended for Physics activity or collaboration involving groups in Physics, others to be discussed case by case):

The financial contribution is towards general lab consumables (typically all the things that are replaced in the regular rota: plastics, waste management, cleaning solvents, common buffers), and maintenance of infrastructure (maintenance, repair, calibration, certification of communal equipment such as fume cupboards, pipettes, balances). Specialised chemicals and other consumables are not included here. Use of some equipment, such as the confocal microscopes, will incur further costs.

Summary of Research activity/interest:

User – I hereby agree to attend any relevant training required by Physics and will abide by the PoM rules and procedures. In particular, I agree to:

- Use equipment only after I have been formally trained by a competent person
- Where a booking system is in place, use equipment only after booking it
- Submit a risk assessment, approved by my supervisor, to the relevant lab manager in PoM, or read and sign up to following an existing risk assessment
- Reading and following any rules and procedures that apply to my work area
- Participate in cleaning and restocking rotas for communal areas and keep my own work area tidy
- Use equipment responsibly, and report any faults to the relevant lab manager

I understand that inappropriate use of the facilities will result in me being banned from using the facilities and that my research group could be fined.
